Pointing Device	Mouse, trackball, or other devices	Mouse, trackball, or other devices
DVD-ROM	Any speed (for installation only)	Any speed (for installation only)

STEP 1

Choose 32 bit or 64 bit version that fits your operation system.

STEP 2

Specify the installation path, check **Read and Accept**, and click [Install Now] to execute installation.

STEP 3

Click [Activate] to launch ZWCAD and activate a license, [Launch] to launch ZWCAD, or [Done] to complete the installation.

There are 2 ways to activate ZWCAD.

①

XXXX-XXXX-XXXX-XXXX-XXXX-XXXX

Soft Key Activation

A 24-character license code is used to activate.

②

Dongle Activation

A dongle and an 8-character license code are used to activate.

There are 2 licensing options for Soft Key license.

Stand-alone (Page 7)

You need to activate each computer with an individual license.

Network (Page 8 - 14)

You need to activate the license on a server first, then come back to the client side to obtain a license from the server via a network connection.

I.I Stand-alone License

The activation should be processed with Internet access. If the Internet access is limited, please choose Offline Activation and follow the guide to activate.

I.II Network License

Network License means the clients get their licenses from a network server that is authorized with a ZWCAD Network License. A Network License is ideal for medium to large organizations with many users. Admin can manage licenses by allowing, limiting or reserving license seats for specific users or groups.

A Network License Manager (NLM) should be installed on the server and both the server and the client need to be configured to enable licensing.

Please refer to the flowchart below.

I.II Network License

I.II.I Install Network License Manager

STEP 1

Choose the Install Network License Manager option.

STEP 2

Choose the 32 bit or 64 bit version according to your operation system.

STEP 3

Click [Next] to run the setup wizard.

STEP 4

Click [Finish] when completed.

STEP 1

Launch the **Network License Configuration** from Windows Start Menu.

STEP 2

> Go to the tab **Config Services**.
> Click [Save Service].

STEP 3

> Go to the tab **Service/License File**.
> Choose **Configuration using Services**.
> Select the service name.
> Check the option.
LMTOOLS ignores license file path environment variables.

STEP 4

> Go to the tab **Start/Stop/Reread**.
> Click [Start Server].

STEP 5

> Go to the tab **Server Status**.
> Click [Perform Status Enquiry].
> Check the text box below to confirm the status.
> You will see the total amount of licenses that have been issued.

I.II.IV Floating and Borrowed License

There are 2 ways to obtain license from server, which are Floating and Borrowed. You can choose one of them to activate the ZWCAD on the client side.

Floating:

The client side can obtain a license from the server automatically when they start ZWCAD. The server dynamically allocates a network license, reclaims the license when the product is inactive and re-allocates it. Network connection between clients and server is always required, which is suitable for in-house working.

Borrowed:

The client side can obtain a license from the server manually and store it locally for a specified period of time (maximum 180 days), so that it can still have the authorization when disconnected from the server, which is suitable for outdoor working.

I.II.IV Floating and Borrowed License

STEP 1

Install ZWCAD according to the installation instruction from Page 3.

STEP 2

Launch the license manager according to the instruction from Page 5 and choose **Activate License**.

The screenshot shows the License Manager interface. The left sidebar has options: Home, Activate License, Online Activation, Offline Activation, Dongle Activation, Request a Floating License, and Borrow a License. The main window is titled 'Floating License-Soft Key' and contains fields for 'Server Name/IP' (192.168.4.23), 'Port' (27000), and a dropdown for 'License on server' (ZWCAD 2023 Professional Edition). A 'Query' button is visible. Below the fields, there is a note: 'Server Name/IP: enter the computer name or IP address of the network license server. Port: the default value is 27000, can be changed accordingly.' An 'Activate' button is at the bottom right.

STEP 3

- > Choose **Request a Floating License**.
- > Fill in the IP address or server name.
- > Select product version.
- > Click [Activate].

STEP 1

Install ZWCAD according to the installation instruction from Page 3.

STEP 2

Launch the license manager according to the instruction from Page 5 and choose **Activate License**.

STEP 3

- > Choose **Borrow a License**.
- > Fill in the IP address or server name.
- > Click [Query] and choose the version you need from the drop-down list below.

STEP 4

- > Specify the validity period you want to use ZWCAD on your computer (maximum 180 days).
- > Click [Activate].

Do not change the default Port value 27000, unless it has been specified.

II. With a Dongle License

Dongle only supports stand-alone license.
(No network license available)

The Product ID can be detected in License Manager after inserting the dongle into the computer.

II. With a Dongle License

STEP 1

Plug the dongle into your computer, and wait until the light on the dongle stops blinking.

STEP 2

Follow the introductions from Page 5 and choose [Dongle Activation].

STEP 3

- > Make sure the Product ID is detected and displayed.
- > Input the corresponding license code into the License Code blank.
- > Click [Activate].

How to Transfer Your License

If you plan to install your current ZWCAD onto another computer or have to do it because of a software or hardware change, e.g. replacing or reformatting a system hard drive, you need to transfer your license(s).

To transfer, you can deactivate your current license on client side, or on server, then activate it again on any new computer.

I. Deactivation - ZWCAD

STEP 1

Launch **License Manager** from Windows Start Menu.

STEP 2

Click the [Delete] icon.

STEP 3

> Click [Return] to proceed. You'll see a success message when done.

The deactivation should be processed with Internet access. If the Internet access is limited, please choose Offline Return then follow the guide to deactivate.

II. Deactivation – Network License Manager

STEP 1

Launch the **Network License Configuration** from Windows Start Menu.

STEP 2

> Go to the tab **Start/Stop/Reread**.
> Check **Force Server Shutdown**.
> Click [Stop Server].

STEP 3

Launch the **Network License Manager** from Windows Start Menu.

II. Deactivation – Network License Manager

STEP 4

> Click [Return], then click [Online].
> Click [OK] to proceed.

STEP 5

You' ll see a success message when done.

The deactivation should be processed with Internet access. If the Internet access is limited, please choose the Offline way then follow the guide to deactivate.

Learn More

If you want to learn more about Installation and Activation, please launch ZWCAD then press F1 or input Help to open the Help system.

You can find the Installation and Registration Guide from the menu on the left side, or visit:

www.zwsoft.com/support/zwcad-instruction-installation

The screenshot displays the ZWCAD 2023 Help interface. The title bar reads "ZWCAD 2023 Help". The main content area is titled "Installation And Registration Guide". The left sidebar contains a navigation menu with the following items:

- ZWCAD Help
 - What's New
 - Commands
 - System Variables
 - Express Tools
 - ArcGIS
 - Installation and Registration
 - Introduction**
 - System Requirements
 - Installation Guide
 - Stand-alone Licensing Guide
 - Network Licensing Guide
 - Deployment (For advanced user)
 - Trouble shooting for licensing
 - License Log Viewer
 - Developer Help
 - User Guide

The main content area is divided into three sections:

Introduction

There are two kinds of licenses: Stand-alone License and Network License. Either Stand-alone License or Network License, the product has no difference in functions. Users can choose anyone corresponding to their needs.

You can use ZWCAD in trial mode for 30 days. During the trial period, the product performs as an activated one.

Stand-alone License

Stand-alone License users can obtain a license by providing an activation ID or installing a dongle. Using either an activation ID or a dongle, the authorization can be transferred from one computer to another.

For the Stand-alone License, you should return the original authorization before activating it on another computer with the same activation ID.

Network License

Network License users can obtain a license from the authorized server. The one with an activation ID can not only distribute but also borrow licenses to workstations.

Workstations can obtain licenses from an authorized server when they connect to this authorized server, which is called Floating License. An authorized server dynamically allocates a network license, reclaims the license when the product is inactive and re-allocates it.

Workstations can obtain licenses from an authorized server and store the authorized information, which is called Borrowing License. The workstation can still have authorization as it has a stand-alone license when disconnected from the server.

At the bottom of the window, there is a footer with the text: "© 1998-2022 Copyright ZWSOFT CO., LTD.(Guangzhou). All Rights Reserved."
